About the need leguide nozzle of Qianhe precision machinery: Founded in 2006, Qianhe precision machinery has been engaged in the precision machinery industry for more than 17 years. Qianhe precision machinery is not only a leading enterprise in the field of tensioners, but also has a strong basic strength in the field of needle guide and thread nozzle. Compared with other guide pins and thread nozzles in the market, the guide pins and thread nozzles of Qianhe precision machinery not only look more beautiful, but also have better and stronger quality. Because Qianhe precision machinery is originally engaged in this industry, with many experienced old masters, it can correctly control every processing procedure, so that the processed products are close to perfection. 千和精密机械有限公司出售导针与线嘴。中国台湾自动化导针线嘴厂家

千和精密机械加工出来的线嘴的优点：千和精密机械拥有雄厚的实力与扎实的基础，对比同行业的线嘴，自然是有其独特的优点的。首先是线嘴的表面光洁度，这个一看就可以看出来，其它厂商线嘴的表面光洁度十分低，光照上去看起来都模模糊糊的，但是千和精密机械的线嘴就不一样的，不仅摸起来手感光滑细腻，甚至还能直接当镜子用呢。然后是内孔的粗糙程度，对线嘴来说，这是重要的参数，千和精密机械所生产的线嘴很好，内孔不仅达到了Ra0.1，两端弧度更是达到了Ra0.025，其实力可见一斑。浙江导针线嘴哪里买千和精密机械销售导针。

红宝石导针系列说明：

红宝石导针(TB系列)产品编号说明：例：TB0403--3010-3008，在其中T表示精密陶瓷，B表示宝石，入线端孔径是 $d_2=0.4$ ，出线端孔径是 $d_1=0.3$ ，大径是 $D=3.0$ ，小径是 $D_1=1.0$ ，总长是 $L=30$ ，小径长 $L_1=8$ ，安装固定平面为P。

TB0403-3010-3008T means precision ceramic, B means ruby, the inlet $d_2=0.4$ mm, the outlet $d_1=0.3$ mm, outer diameter $D=3.0$ mm, outer diameter $D_1=1.0$ mm, total length $L=30$ mm, outer diameter length $L_1=8$, Pisthe mounting fixed plane.

马达出线嘴的加工方式与特点：1、该产品有两种材料加工方式：a、超硬质合金HRC90° b、质量合金钢经真空热处理HRC60度-62度。经过各种要求的形状磨加工，然后再经过精细研磨抛光处理，改线嘴按照孔的数量分有：单孔，双孔及多孔，按照出线端的外部形状分有：扁形，椭圆形等等。该线嘴被广泛应用于电机定子、转子的全自动绕线过程，深受广大客户的喜爱与支持。2、该产品可根据用户产品情况进行定制加工，以满足用户在不同场景下的使用需求。千和精密机械有限公司的导针。

线嘴的维护与保养：线嘴可分为合金类的和宝石类的两类材质，合金类的平时要注意，还没有上机使用的线嘴要连包装盒一起用密封袋包装好，因为钨钢材料在空气中很容易氧化，一旦氧化了，表面会形成氧化斑，不容易除掉，在安装过程中防止线嘴落地，钨钢材料的硬度很高，脆性也很大，落地就会碎。

Maintenance and repair of wire nozzles: wire nozzles can be divided into alloy materials and gemstone materials. Alloy materials should be paid attention to at ordinary times. Wire nozzles that have not been used in the machine should be packed with sealed bags together with packaging boxes, because tungsten steel materials are easy to oxidize in the air. Once oxidized, oxidation spots will form on the surface, which are not easy to remove. In order to prevent wire nozzles from landing during installation, tungsten steel materials have high hardness and great brittleness, It will break when it hits the ground. 千和精密机械有限公司线嘴生产。浙江导针线嘴哪里买
